Fax: +44 (0) 1983 856208

### Venue

Portsmouth Historic Dockyard  
Princess Royal Gallery  
Victory Gate  
HM Naval Base  
Portsmouth  
PO1 3LJ  
UK

### The Espace Manche Development Initiative (EMDI)

Developed in the framework of the Channel Arc Manche, the EMDI project aims to extend and reinforce Franco British co-operation in the Channel Area and is co-financed by the European Commission's Interreg IIIB programme.

The project started in October 2004 and has three objectives; the development of a web-based knowledge platform; the production of a strategic vision document; and the development of pilot actions in five thematic working groups.

The Higher Education, R&D and transfer of technology working group, co-ordinated by the Isle of Wight Council's Centre for the Coastal Environment, is hosting this Business Fair.

**This event is FREE to all participants and includes lunch & refreshments. Please register in order to secure a place.**

### Marine Renewable Energy Research & Development in the Channel Region

Building co-operation between developers and researchers in leading edge sustainable energy technologies across the Channel including tidal energy, wave energy and offshore wind farms.

### Conference Participants

Universities, Companies, Local Authorities, Researchers & Development Agencies based in the Channel Region
